The Honorable James Comer
United States House of Representatives
2410 Rayburn House Office Building
Washington, DC 20515

Dear Representative Comer:

As the state senator representing the 2nd Senate District, I write to express my full support of the capacity expansion project being undertaken by the Crittenden-Livingston Counties Water District for its Cumberland River facility.

As you are aware, the city of Marion, Kentucky, lost its raw water supply in April of 2022 when the Lake George Dam failed. Crittenden-Livingston Counties Water District has been able to provide a limited amount of water to Marion's water system since that time. This assistance has pushed the district's plant to maximum capacity while still not meeting the full needs of Marion which is supplementing the district provided water from its smaller secondary reservoir which is undersized. The city remains under emergency water use restrictions with a Declaration of Emergency declared by Governor Beshear still in effect. In order to provide an adequate supply of drinking water to both Marion and its own two county service area, it is critical that the Crittenden-Livingston Counties Water District plant expand its capacity as soon as possible.

Thank you for your consideration in this matter, and please let me know if I can provide any additional information.

Sincerely,

A handwritten signature in black ink that reads "Danny Carroll".
