RE: Henderson Water Utility – North Wastewater Treatment Plant Biosolids Reduction Upgrade

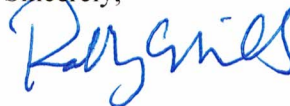

Dear Congressman Comer:

I am writing to express my strong support for the Community Project Funding Request aimed at upgrading the North Wastewater Treatment Plant Biosolids Reduction system operated by Henderson Water Utility. This crucial funding would enable the utility to modernize its treatment technology, addressing the imminent need due to the aging condition of their current equipment.

The proposed upgrades are not only essential for maintaining regulatory compliance but also promise a significant reduction in sludge volume. This efficiency improvement is expected to lead to substantial cost savings, benefiting both the utility and the ratepayers alike. Securing this funding would empower the utility to enhance its infrastructure, paving the way for further economic growth and development opportunities.

I urge you to give consideration to this funding request on behalf of Henderson Water Utility. Should you require any additional information or have further questions, please do not hesitate to contact me directly at (270) 724-9981.

Sincerely,

Robby Mills

The Honorable James Comer
United States House of Representatives
2410 Rayburn House Office Building
Washington, D.C. 20515

Dear Representative Comer:

This letter is written in support of the Community Project Funding Request for Henderson Water Utility's North Wastewater Treatment Plant Biosolids Reduction Upgrade Project. It is my understanding that, if awarded, Henderson Water Utility will use this funding to upgrade the treatment technology at their North Wastewater Treatment Plant.

The existing treatment equipment is at the end of its useful life and these capital upgrades are necessary to remain in regulatory compliance and will reduce overall sludge volume, resulting in a cost savings for the utility and rate payers.

Henderson Water Utility is a major economic driver for this community. If received, this funding will allow the community to improve critical infrastructure and create additional economic development opportunities.

Thank you for your consideration of this matter. If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Jonathan Dixon".
