Washington, DC 20515

Re: Support for Frankfort's Combined Sewer Separation "Community Project Funding" Request

Dear Congressman Comer:

I write in support of the City of Frankfort's Community Project Funding request for the Bellepoint Combined Sewer Separation Project. Frankfort seeks U.S. Environmental Protection Agency (EPA) State and Tribal Assistance Grant (STAG) funding to improve drainage and water quality in a lower-income area.

The Bellepoint subdivision in Frankfort is served by a combined sewer system, which is challenged by age and deterioration. Wet weather events overwhelm local catch basins, flood streets, and lead to Combined Sewer Overflows (CSO's) to the Kentucky River. The area would benefit by a separation of sanitary and stormwater flows. This would reduce the volume of water treated at the wastewater treatment plant, as well as reduce CSO's, thereby improving water quality. If funded, the project will improve quality of life in the Bellepoint area. Catch basins, curb and gutter, and separation of sanitary and storm sewer infrastructure will ensure the health and well-being of an underserved population.

Please give the highest consideration to the City of Frankfort's request for Community Project Funding.

Sincerely,

A handwritten signature in black ink that reads "Derrick W. Graham". The signature is written in a cursive style.

Derrick W. Graham  
State Representative, 57<sup>th</sup> District
