To whom it may Concern,

I am writing to express my wholehearted support for the Wastewater Treatment Plant Modifications and Improvements Project proposed by the City of Adairville. As the Logan County Judge Executive, I recognize the critical importance of upgrading our community's infrastructure to meet the needs of our residents and ensure sustainable growth for the future.

The proposed project to enhance the wastewater treatment plant in Adairville is a significant step towards improving public health, protecting the environment, and promoting economic development in our region. It is evident that our current wastewater treatment infrastructure is aging and struggling to cope with the demands of our growing population and evolving environmental regulations.

By investing in these modifications and improvements, the City of Adairville is demonstrating its commitment to providing efficient and reliable wastewater services to its residents and businesses. Upgrading the treatment plant will not only enhance the quality of our water resources but also contribute to the overall well-being and prosperity of our community.

Furthermore, this project aligns with our county's goals of promoting sustainable development and preserving our natural resources for future generations. By implementing state-of-the-art technologies and practices, we can minimize the environmental impact of wastewater discharge and ensure compliance with regulatory standards.

I commend the City of Adairville for taking proactive steps to address this important issue and urge all stakeholders to support the Wastewater Treatment Plant Modifications and Improvements Project. Together, we can create a healthier, cleaner, and more resilient community for all residents of Logan County.

Thank you for your dedication to advancing this crucial initiative. Please do not hesitate to contact me if I can be of any assistance in advocating for or facilitating the implementation of this project.

Sincerely,

TO WHOM IT MAY CONCERN:

We are aware of the problems with our wastewater system and know the importance of having a good functioning system. The repairs and construction are a must for our city to have done. The majority of our citizens take great pride in our town and want to encourage others to live and start businesses here and to grow we must have a good infrastructure.

It is very important that Adairville gets this project done and any funding you can offer we need. Our organization wants to go on record in support of this project as all the citizens use this wastewater system. Please consider their request for funding.

Sincerely,

Danny Finch
President

To Whom It May Concern:

I am writing to express my support for the City of Adairville to receive the grant to support our local water waste system. As the largest entity in the city limits, Adairville School is dependent on the stability of such a system. I can't imagine the negative impact on our school and the educational process if these services were even temporarily shut down.

Our small town desperately needs to make improvements to our water waste system to avoid such catastrophe. However, fiscal resources are limited in a small city like Adairville and repairs and updates are often beyond our reach, putting our community and our school at risk. Please consider the City of Adairville for this generous grant in order to support our fragile infrastructure.

Thank you for your consideration.

Sincerely,

A handwritten signature in cursive script that reads "Lori Bouldin".
