**MIKE WILSON
MAJORITY WHIP**

April 30, 2025

Congressman James Comer
2410 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Comer:

Please accept this letter as confirmation of my support on behalf of the City of Adairville to secure funding through the FY26 Community Project Funding grant request.

This funding for \$7 million, if awarded, will be used for the wastewater project. I completely support the pursuit of the CPF grant. Your consideration of this request is appreciated and as always, thank you for working hard the people of Kentucky. Please feel free to reach out with additional questions, 502-564-2450.

Sincerely,

A handwritten signature in cursive script that reads "Mike Wilson", followed by a horizontal line.

KENTUCKY GENERAL ASSEMBLY

State Capitol

Frankfort, Kentucky 40601

502-564-8100

May 1, 2025

The Honorable James Comer
United States House of Representatives
2410 Rayburn House Office Building
Washington DC 20515

Dear Representative Comer:

This letter of support is written on behalf of the City of Adairville and their grant application for modifications and improvements to the Adairville Wastewater Treatment Plant.

As the state representative for Logan County, Kentucky, and as chairman of the House Appropriations and Revenue Committee, I know that the continued need for new and upgraded infrastructure is paramount. Having solid wastewater systems in place allows us to provide safety for our business and residents, protect the environment, and promote economic development in some of our most rural locations.

In order to meet the current and future demands placed on this system, I am in full support of the City of Adairville and their efforts to secure this funding. Your consideration of the merits of this application would be appreciated.

Thank you in advance for your time and attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Petrie".

April 25, 2025

The Honorable James Comer
2410 Rayburn HOB
Washington, DC 20515

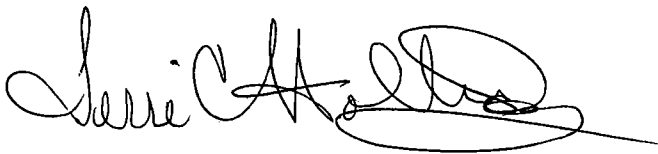

Dear Representative Comer:

On behalf of Adairville South Logan Chamber of Commerce, I would like to express full support for the proposed construction of a New Wastewater Treatment Plant in Adairville, Kentucky. The city of Adairville and its businesses will benefit greatly now and in the future long-term with this new plant.

We are a small community that sits on the Kentucky-Tennessee line. Many people chose to live here for the quaint atmosphere and work in the larger cities such as Russellville, Bowling Green and Nashville, Tennessee. The small town living attracts many and for this reason we want to provide the best possible conditions for our citizens. The New Wastewater Treatment Plant will do just that. Please help us to be able to fund this project for our children, families and senior adults.

Thank you for taking the time to read this letter and consider our town's request. With your help we can make this dream a reality.

Respectfully,

A handwritten signature in black ink, appearing to read "Terri Clinard Holliday", with a large, stylized flourish at the end.

LEWISBURG BANKING COMPANY

"WE WANT TO BE THE ONLY BANK YOU WILL EVER WANT OR NEED"

April 23, 2025

The Honorable James Comer
2410 Rayburn HOB
Washington, DC 20515

Dear Representative Comer:

On behalf of Lewisburg Banking Company, I am writing to express our full support for the proposed construction of a new wastewater treatment plant in Adairville, Kentucky. As the only financial institution operating within the Adairville community, we recognize both the critical need for this infrastructure project and the long-term benefits it will bring to our city and surrounding region.

Lewisburg Banking Company has been committed to Adairville and South Logan County since our acquisition of the local branch in 2010. Our investment then was rooted in a belief in the area's potential, and that belief remains strong today. As a community-oriented bank, we understand that basic infrastructure—like reliable wastewater treatment—is essential for sustainable growth, economic development, and public health.

Adairville sits just a mile from the Tennessee State line and only a 20-minute drive from Springfield, TN. This proximity positions us to benefit from the natural expansion of development and residential growth from northern Tennessee. However, in order to attract and support new businesses, residents, and job opportunities, Adairville must be prepared with modern, scalable infrastructure.

The construction of a new wastewater treatment plant is not only a forward-thinking move—it is a necessary one. It will provide the foundation for responsible development and ensure that our town is equipped to handle the demands of future growth while protecting the health of our environment and community.

To Whom It May Concern,

I am writing to express my strong support for the City of Adairville's application for funding to improve our local wastewater system. As the principal of Adairville Elementary School—the largest institution within our city limits—I can personally attest to the critical importance of this infrastructure to the well-being of our students, staff, and broader community.

A reliable wastewater system is essential for maintaining a safe and healthy learning environment. Any disruption, even temporary, would have a serious impact on our daily operations and the educational process. It's not just a matter of convenience—it's a matter of public health and safety.

Like many small towns, Adairville faces financial limitations that make it difficult to fund much-needed upgrades to aging infrastructure. Without external support, these essential improvements remain out of reach, putting our school and community at ongoing risk.

I respectfully urge you to give full consideration to the City of Adairville's grant application. Your support would not only help safeguard our infrastructure, but also directly contribute to the stability and future of our town and its children.

Thank you for your time and consideration.

Sincerely,

Lori Bouldin

Washington, DC, 20515

Dear Representative Comer:

On behalf of ProSolutions, LLC – Adairville KY location, I am writing to add our support for the proposed construction of a new wastewater treatment plant in Adairville Kentucky.

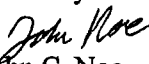

As a business member of the Community which works with the farmers in the surrounding area, we have experienced the need, realize and agree with the long term benefits a new waste water treatment plant would afford to the folks who live in this area.

ProSolutions, LLC has been a member of the City of Adairville/Logan County Community for 11 years. We have invested in the area through property purchases and working with local farmers to grow their investments in the local and regional markets.

We continue to look for ways to increase and support all farm production. We also work closely with many Landscaping outfits, schools, municipalities, and golf courses to find economic ways to improve their systems and output. A new wastewater treatment plant in the area would help tremendously with cost effectiveness and efficiency of crop/lawn/ornamental protection products in any of these professions.

Thank you for your time and support in the matter of the wastewater treatment plant needs in Adairville KY.

Sincerely

John C. Noe – Manager
